8 decisions, portfolio to shelf - every agent shown as its business name + standard AI Refinery agent class - orchestrator → su

8 decisions, portfolio to shelf - every agent shown as its business name + standard AI Refinery agent_class - orchestrator → su

The screenshot displays the NPI Decision Flow interface, a complex system for product launch planning and execution. The interface is organized into several key sections:

- Top Navigation:** Includes the company name 'accenture | HSY' and the project title 'Hershey's (HSY) • Accenture - New Product Introduction'.
- Main Content Area:** A grid of agent cards and workflow steps.
 - Workflow Steps (Columns 1-8):** Each column represents a step in the process, from 'Portfolio & Launch Planning' to 'Post-Launch Optimization & Scaling'. Each step includes a 'Placeholder' box and a 'Transformed' box.
 - Agent Cards:** Each 'Transformed' box contains an agent card. Agents are categorized into 'AGENT' (FlowSuperAgent, CustomAgent, ToolInsightAgent) and 'HUMANAGENT' (Touchpoint 1 - Launch Plan Approval, Touchpoint 2 - Exception Review, Touchpoint 3 - Post-Launch Reevaluation).
 - Capabilities:** Each agent card lists specific capabilities, such as 'Aera Skill (deterministic)', 'Aera Skill (deterministic)', 'Aera Skill (deterministic)', 'Aera Skill (deterministic)', 'Aera Skill (deterministic)', 'Aera Skill (deterministic)', 'Aera Skill (deterministic)', and 'Aera Skill (deterministic)'.
- Bottom Sidebar:** Contains a 'CAPABILITY LEGEND' with various icons and a 'TOOL INSIGHT AGENT' section.

The interface is highly interactive, with many buttons and links, and is designed to be used by multiple users simultaneously.
